How to read the PRISM

Perspective	O: Trained 3rd party observer (APT, n=78); Y: Youth common survey (SAYO-Y, n=69)
Benchmark	Threshold of program quality suggested by Boston After School & Beyond and NIOST. 3 or Higher Lower than 3
Change	Change in program management practices from Summer 2014 to Summer 2015 Positive change No change Negative change
Program	Program's average. 1-4 Scale (4 highest quality measure).
2014	Program's previous year average
SLP	Summer Learning Project average; 16 programs engaged in common program planning, delivery, and quality measurement with BASB and the Boston Public Schools
BSLC	Boston Summer Learning Community average; 79 programs (including SLP) engaged in common program quality measurement for continuous improvement

The green circle, yellow triangle and red diamond are indicators based on how program's average falls along a normal distribution of the overall SLP or BSLC Programs. The 'gold star' indicates top performers.

SLP	Summer Learning Project average (SLP, 16 programs)
Perspective	T: Teacher (SAYO T)

Percentage of Students Meeting or Exceeding Benchmark

The percentage of students who either "usually" or "always" demonstrate behavior associated with each skill (benchmark of at least "4 = usually"), at both the beginning and end of the summer, as rated by teachers.

Percentage of Students Achieving Meaningful Growth

Meaningful skill growth is an increase of 1.0 or more in pre-post SAYO-T. This associates to moving up at least one level in frequency of demonstrated skill behavior. Ex: a student who sometimes (3) demonstrates the skill by summer's end, and had only rarely (2) demonstrated the skill at the beginning of the summer, has achieved meaningful skill growth (3-2 = 1).
